## LED LIGHTING SOLUTIONS

Energy retrofits with  
Enlux® bulbs is as easy as:

**1-2-3**

- 1. unscrew old bulb**
- 2. screw in LED bulb**
- 3. enjoy!**

- Energy saving retrofits as easy as a simple bulb change. Full plug and play operation.
- Fully dimmable. Use electronic low voltage dimmer for a flawless performance.
- Turn it on and off as many times as you need without sacrificing bulb life.
- 20 years life at 6 hours of use per day means that you may never change a bulb again.
- Easy retrofit for downlights, including insulated ceiling (IC) rated downlights.
- 12 watt LED replaces 75 watt incandescent for substantial energy savings.
- RGBY technology to bring out vivid colors.
- Safe = no mercury, no lead, robust enclosure, very low heat operation.
- No more waiting in a dim room for your fluorescent bulb to warm up.
- No neurotoxins to pose a health hazard to you and your family.
- GU24 base available for Title 24 compliant applications.
- No hazardous disposal issues.
- 100% recyclable.
